

QUALITY TIP

What is Holistic Assessment?

Holistic Assessment is a buzz word that's been around for a while now and like all buzz words most people are asking "**What does that even mean?**"

Stripped down to its nuts and bolts all Holistic Assessment means is that we are assessing the **Element and all its Performance Criteria** in the **same Assessment Task**.

So basically we don't want to see:

- performance criteria 1.1 assessed in task 1
- performance criteria 1.2 assessed in task 4; and
- performance criteria 1.3 assessed in task 2

Elements and Performance criteria are just like the Spice Girls - Great together but they should never be allowed to work on their own!
