QUALITY TIP

Where do I find the Health Care Information for my students?

Information about the health status of your students can be found on the intranet. Simply click on the red link “Emergency Health Care Information” which can be found at the top of the ‘Important links’ section on the far right hand side of your screen.

Choose the relevant Management Group and then the required qualification.

A list of students will appear and next to these will be any identified health care issues. Where a name appears in red text it means that student is a minor.

Please note that information will only appear in this section for those students who elect to complete the emergency health care information form as it is not compulsory for all students.
